Technical Skills:

Programming: Python 3, HTML5, CSS, JavaScript, SQL

Front End: React, Redux, DOM Manipulation, React Hooks

Back End: Django, FastAPI, PostgreSQL

System Design: Monoliths, Domain-driven design, Microservices

Application Development Experience:

Reel Review - github.com/blackfengx/reel-review

2023

A movie reviewing website featuring a FastAPI back-end with a React front-end.

- Assembled a combination of Python, JavaScript, React, HTML, CSS and FastAPI to extract data from third-party API's and implement them into a website with over 15 features.
- Employed a PostgreSQL database to handle account, movie, and review data.
- Implemented an authentication system using JWT allowing the user to create an account, sign in, and review any movie on the API with said account information.

Velocity - github.com/blackfengx/velocity

2022

A car selling website that features a Django back-end with a React front end.

- Established deep full-stack knowledge by coupling a powerful back-end Django framework with a React front-end.
- Utilized knowledge of microservices to create, fetch, and maintain data.
- Finalized design and details through mastery of Bootstrap.

Professional Experience:

Uber

2020-2022

Uber Driver - Dallas, TX

- Facilitated over 1000 rides resulting in a satisfaction rate of 99.78% with a rating of 4.99 stars.
- Used a vehicle to provide service so clients could arrive at their preferred destination.
- Navigated the different cities of the DFW area using and mastering the intricacies of the Uber application.

Target Distribution Center

2021-2022

Warehouse Associate/Order Picker - Midlothian, TX

- Exported e-commerce orders to members and shipped returned goods back to vendors.
- Loaded and unloaded trailers in a team of 3, to swiftly sort and transport goods, ensuring the loading trucks got in and out promptly.
- Kept the workspace clean and worked in different departments of the warehouse when called upon, including forklift and EPJ operation, packing, and more.

Education:

Hack Reactor, Advanced Software Engineering Immersive

2023

Tarrant County College, Coursework

2017-2019
